

Innovated "Concise" Instruments for your Beauty

Certified ISO 9001, CE Mark, cGMP / FDA Approved

Concise Enterprises

**Manufacturers & Exporters of Manicure, Pedicure (Beauty Care),
Medical Implements & Scissors**

Some Words

Concise Enterprise (Certified ISO 9001, CE Mark, cGMP / FDA Approved) was established in 1982 the name of ergonomics, long-lasting quality and steady progress in beauty instruments filed, as a family managed company for the development and production of most sophisticated instruments for beauty applications.

The experience and knowledge transferred from the fore-fathers to founder (Mr. Muhammad Yousaf Late) count to be the back bone of excellent quality **CONCISE** products.

The theme behind this whole setup was to adopt new trends and technologies which would enable " **CONCISE** " to over come the conventional race of Manicure, Pedicure, Beauty instruments.

We are trying our best to provide you the best service and atmosphere to do business. Today, **CONCISE Enterprises** well known throughout world for its workmanship, competitive prices, and prompt services. Concise is equipped with modern facilities to manufacture instruments according to needs of its Valued Customer.

Concise Enterprises is thankful to all of its worthy customers for their trust and for their appreciation of quality and services Concise provide them.

Innovated "Concise" Instruments for your Beauty

Cuticle / Nail Fancy Scissors

All scissors are crafted from best quality stainless steel through hot drop forging method, which gives the instrument a sturdy formation and nice profile. The assembly consists of machine-Made screw for smooth and frictionless operations. The surface finish gets the final out look after multiple grinding, polishing and cleaning processes.

Available in following finishes:

Mirror

Satin

Sand-blasted

Gold-plated completely or partially

Partially color coated

Cuticle / Nail Nippers

All nippers are completely hot dropped forged from stainless steel in two categories;

1) Lap joint

2) Box joint

Each tool is machined and milled for perfection during assembly, which is then aligned to prevent slipping of the cutting tips. The angle of sharpness is designed to make low force cutting functions.

Available in following finishes:

Mirror

Satin

Sand-blasted

Gold-plated completely or partially

Partially color coated

Concise

Professional Barber Razer Edge Shears
Professional Barber Shears
Barbar Scissors
Hair Shapers & Razor Knives

Cutting Styles & Techniques

Cutting Position Depending On Handle Type

Point Cut, Blunt Cut, Slide Cut, Slice Cut

Chipping, Fan Cut

Thinning Styles & Techniques

Thinning, Tapering, Blending, Texturizing

Material

Japan Stainless Steel AISI 420h, AISI 440a,

French Cobalt Steel

Shapping

Castings: Liquid Metal Is Poured Into A Mold

If Properly Hardened, It Can Be Durable, But

Will Not Hold The Edge As Long As A Forged Shear

Drop Forging: A Weighted Mold Is Dropped With

Great Pressure On To A Hot Bar Of Steel

The Alloy Is Pound Into A Desired Shaped Which

Makes The Metal More Dense. The Blade Holds

As Edge Longer And Is More Malleable.

Compression Forging: The Metal Is Crushes Into A

Desired Shape, Yielding A Highly Dense Metal.

Compression Forging Makes It Possible To Have A

Lighter Shear With Tremendous Strength.

Other

Titanium Coating, Super Mirror Finish, Triple

Annealed, Vacuum & Sub-zero Tempering
